

Ceropegia hederaceum

“Bushman’s Pipe”

Light/Sun Exposure

- Grow best in indirect light or part shade. No full sun.
- Insufficient light causes the plant’s stem to grow and leaves will become more spread apart..
- Direct sunlight can burn the leaves.

Watering Instructions

- Water regularly. If leaves are paper thick, there is not enough water.
- Allow the soil to dry out slightly between watering
- Allow for proper water drainage

Temperature

- The Ceropegia does best in temperatures that are steady between 60-80 °F
- Temperatures under 55°F will start to cause damage to the leaves.
- Air humidity should be at 50-75%.

* This is a succulent flowering plant. Flowers occur singularly or in an umbel-like cluster.
