

Philodendron hederaceum

“Heartleaf Philodendron”

Light/Sun Exposure

- Grow best in indirect light or part shade. Avoid direct sunlight.
- Insufficient light causes the plant’s stems to become spindly.
- Direct sunlight can burn the leaves.

Watering Instructions

- Water regularly. Reduce watering in the winter months.
- Allow the soil to dry out slightly between watering
- Allow for proper water drainage

Temperature

- The Heartleaf does best in temperatures that are steady between 60-80 °F
- Temperatures under 55°F will start to cause damage to the leaves.
- Air humidity should be at 50-75%.

* Leaves are the ornamental part of the plant. Rarely flowers but foliage is evergreen.
