

Ficus benjamina

“Weeping Fig”

Light/Sun Exposure

- Grow best in indirect light or part shade. Avoid direct sunlight.
- Insufficient light causes the plant to stop growing.
- Direct sunlight can burn the leaves.

Watering Instructions

- Water moderately. It is also important to spray leaves with boiled warm water.
- Allow the soil to dry out slightly between watering
- Allow for proper water drainage

Temperature

- The Ficus does best in temperatures that are steady between 60-80 °F
- Temperatures under 55°F will start to cause damage to the leaves.
- Air humidity should be at 50-75%.

* Leaves are the ornamental part of the plant. Pruning shrubs for ornamental purposes and size control are recommended.
